

Custom Performance Program

Installation Report

Installation Date: _____
(Date that Equipment was installed and operational)

Energy/On-Peak Demand Savings and Incentive Adjustment

- For measures with changes made during installation, please resubmit revised Energy Saving Measure Input form(s).
- For measures with changes based on Calculated Savings, please submit revised engineering calculations.

Incentive is capped at 75% of each measure installed cost. An adjustment may be made after review of project costs.

Installation and Operation Statement

_____, the undersigned, herby certifies that the Energy Efficiency Measure(s) have been installed, functionally tested, and proven capable of operating and being maintained to perform in conformity with their design intent. The installation date of operation of the Energy Efficiency Measure(s) and any required monitoring data collection per approved measurement and verification (M&V) plan are also certified. Check the appropriate box:

- No changes to the proposed measures have been made.
- Due to changes to the proposed measures, appropriate Energy Savings Measure forms have been resubmitted and/or adjustments in the savings calculations have been made.
