

# LOS ANGELES GROUNDWATER REPLENISHMENT PROJECT

## ELECTRICAL CONDUIT CONSTRUCTION on Victory Blvd in Van Nuys, CA

### PROJECT OVERVIEW

The Los Angeles Department of Water and Power (LADWP) is constructing approximately 2 miles of underground electrical infrastructure to provide sustainable power to the advanced water treatment facility as part of the Los Angeles Groundwater Replenishment (LAGWR) Project.

**The LAGWR Project will create a new, local, drought-resistant source of purified water for over 500,000 Angelenos by 2028.**

Construction of the electrical conduit is planned to begin in early 2027 with temporary lane closures on Victory Blvd. Construction is planned to reduce traffic disruptions, sustain public access, and protect public safety. The City is committed to minimizing impacts through careful planning, coordination, and ongoing communication with neighboring residents, businesses and stakeholders.

### TENTATIVE CONSTRUCTION TIMELINE

Construction is anticipated to begin in early 2027 with crews working east from Densmore Ave to Van Nuys Blvd.

#### 2027

- Q1** Construction begins at Densmore Ave with reduced lanes in both directions.
- Q2** Construction continues on Victory Blvd from Sepulveda Blvd to Cedros Ave with reduced lanes in both directions.
- Q3** Construction continues on Victory Blvd from Cedros Ave to Van Nuys Blvd with reduced lanes.
- Q4** Conduit construction is completed.

### NEXT STEPS

- The City is finalizing the design, permit, and construction schedule for the planned work, including coordination with the the Bureau of Engineering, Los Angeles Department of Transportation, Caltrans and the Van Nuys Community.
- Nearby residents and businesses will be notified in advance of construction activities. We appreciate your patience as we deliver this critical power and water supply project!
