## **1 EXECUTIVE SUMMARY**

---

A Phase I Environmental Site Assessment (ESA) was performed by Kleinfelder for the Los Angeles Department of Water and Power (LADWP / “Client”) of the property associated with Kern County Assessor’s Parcel Number (APN) 359-051-28 (referred to as the “Site”), located in the unincorporated town of Rosamond, Kern County, California. Kleinfelder understands that LADWP is requesting a Phase I ESA for due diligence in support of a potential property transaction as part of the Rosamond Switching Station.

This Phase I ESA was performed in conformance with ASTM International Designation E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (the ASTM Standard), and the All Appropriate Inquiry (AAI) section of the Small Business Liability Relief and Revitalization Act (the Federal Brownfields Law).

A summary of the Phase I ESA findings is provided below:

- The Site comprises an approximately 2.28-acre parcel of land, identified as Kern County APN 359-051-28, located adjacent to the south of Rosamond Boulevard, approximately 485 feet west of the intersection of Rosamond Boulevard and 100<sup>th</sup> Street West, in the unincorporated town of Rosamond, Kern County, California. The Site is undeveloped land, which is covered in sparse low-lying desert vegetation.
- Historical information reviewed for this Phase I ESA indicates the Site was vacant, undeveloped, and vegetated from 1915 through present.
- Due to access restrictions, the Site was observed from public rights-of-way. No structures were visible, and the Site appeared to be undeveloped with low-lying vegetation. No evidence of unauthorized dumping was observed.
- No off-Site facilities were identified as potential concerns to the Site.

In summary, Kleinfelder’s Phase I ESA did not identify recognized environmental conditions (RECs), controlled RECs (CRECs) or historical RECs (HRECs) associated with the Site.

Deviations from the Phase I ESA Standard (if any) are discussed in Section 8.1 of this report. This report is subject to the limitations provided in Section 2.5.

## 2 INTRODUCTION

---

This report is a summary of work performed using the guidelines set forth in ASTM Standard and AAI standards of the Federal Brownfields Law. This report also generally conforms to the ASTM Standard's suggested table of contents. Minor format modifications have been made to the ASTM Standard's suggested table of contents to assist in better reading and understanding the report findings.

### 2.1 PURPOSE

The purpose of this Phase I ESA is to identify RECs related to the Site to the extent feasible, pursuant to the scope of services defined in Kleinfelder's August 26, 2019 Proposal No. MW180800.001P/LAN19P99810 and the limitations discussed in this report. As defined in the ASTM Standard, a REC is:

*The presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.*

As defined in the ASTM Standard, a *de minimis* condition is:

*A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.*

ASTM Standard E 1527-13 also introduced the designation of CREC. As defined in the ASTM Standard, a CREC is:

*... a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place*

*subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).*

Additionally, the ASTM Standard defines HRECs as:

*...a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to environmental controls.*

The final decision on whether a past release is an HREC rests with the Environmental Professional and will be influenced by the current impact (if any) of the past release to the Site.

This report describes Kleinfelder's assessment methodology and documents the findings, subject to the limitations presented in Section 2.5 of this report.

Kleinfelder professionals performing this Site assessment included Ms. Lindsay Gattman, who performed the Site reconnaissance and is the primary author of this report. Ms. Margaret Carroll also performed the Site reconnaissance visit and provided project oversight. Ms. Lizanne Simmons provided project oversight. Resumes of Environmental Professionals are available from Kleinfelder upon request.

## 2.2 DETAILED SCOPE-OF-SERVICES

The following sections describe Kleinfelder's work scope:

- Section 2, **Introduction**, includes a discussion of the purpose/reason for performing the Phase I ESA, additional services requested by the Client (e.g., an evaluation of business environmental risk factors associated with the Site), significant assumptions (e.g., property boundaries if not marked in the field), limitations, exceptions, special terms and conditions (e.g., contractual), and user reliance parameters.
- Section 3, **Site Description**, is a compilation of information concerning the Site location, legal description, current and proposed use of the Site, a description of structures and improvements on the Site at the time of Kleinfelder's assessment, and adjoining property use.

- Section 4, **Records Review**, is a compilation of Kleinfelder’s review of several databases available from Federal, State, and local regulatory agencies regarding hazardous substance use, storage, or disposal at the Site and for off Site facilities within the search distances specified in the ASTM Standard. Records provided by the Client are summarized (if any), and copies of relevant documents are included in the appendices of this report. Physical setting sources (including topography and soil and groundwater conditions) and typical Client-provided information (e.g., title records, environmental liens, specialized knowledge, valuation reduction for environmental issues, and owner, property manager, and occupant information) are also summarized in this section. Other interviews with people knowledgeable about the Site (including the Client) are included in Section 7.
- Section 5, **History of the Site**, summarizes the history of the Site and adjoining properties. This Site history is based on various sources, which may include a review of historical aerial photographs, Sanborn Fire Insurance Maps, city or suburban directories, historical topographic maps, building department records, and results of previous Site assessments (if any and reasonably ascertainable).
- Section 6, **Site Reconnaissance**, describes Kleinfelder’s observations during the Site reconnaissance. The methodology used and limiting conditions are described.
- Section 7, **Interviews**, is a summary of telephone and personal interviews performed with “Key Site Managers” that may include the Site owner/manager, occupants/tenants, local government officials, and the Client. Additional interview sources may be contacted if Key Site Managers were not available prior to production of this report, and may include adjoining landowners and people with historical knowledge of the area.
- Section 8, **Evaluation**, is a presentation of the findings and opinions regarding the information in Sections 3 through 7, and presents the conclusions regarding the presence of RECs, HRECs, CRECs, and *de minimis* conditions connected with the Site, and recommendations.
- Section 9, **References**, is a listing of the resources used to compile this report.

A statement of qualifications of the signatories of this report is provided in Appendix A of this report, and pertinent documentation regarding the Site is included in Appendices B through D.

## 2.3 ADDITIONAL SERVICES

An evaluation of business environmental risk associated with the Site was not included in Kleinfelder's scope of services. The scope of this Phase I ESA does not incorporate ASTM Standard non-scope considerations such as asbestos-containing materials (ACMs), radon, lead-based paint, lead in drinking water, regulatory compliance, industrial hygiene, health and safety, indoor air quality, and high-voltage power lines.

## 2.4 SIGNIFICANT ASSUMPTIONS

Kleinfelder does not guarantee the accuracy of the information supplied by its sources but reserves the right to rely on this information in formulating a professional opinion on the potential for contamination at the Site. Kleinfelder also assumes the Client provided all applicable and available environmental records and specialized knowledge regarding the Site. Kleinfelder has not made other significant assumptions during the performance of this Phase I ESA.

## 2.5 LIMITATIONS AND EXCEPTIONS

Phase I ESAs are non-comprehensive by nature and may not identify all environmental problems, and will not eliminate all risk. This report is a qualitative assessment.

Kleinfelder performed this Phase I ESA in general accordance with the guidelines set forth in the ASTM Standard, and the proposed scope subsequently approved by the Client. No warranty, either express or implied, is made. Environmental issues not specifically addressed in this report were beyond the scope of services and not included in Kleinfelder's evaluation.

This report may be used only by the Client, and only for the purposes stated within a reasonable time from its issuance, *but in no event later than 180 days from the date of the report*. Land or facility use, on- and off-Site conditions, regulations, or other factors may change over time, and additional work may be required with the passage of time. Since Site activities and regulations beyond Kleinfelder's control could change at any time after the completion of this report, the observations, findings, and opinions can be considered valid only as of the date of the Site visit. This report should not be relied upon after 180 days from the date of its issuance (pursuant to the ASTM Standard's Section 4.6).

Los Angeles Department of Water and Power  
Rosamond Switching Station  
APN: 359-051-28, Rosamond, Kern County, California  
Phase I Environmental Site Assessment

## 2.6 SPECIAL TERMS AND CONDITIONS

Kleinfelder was requested to perform a Phase I ESA of the Site. No other special terms and conditions were agreed to by the Client and Kleinfelder.

### 3 SITE DESCRIPTION

The Site description is presented in this section and describes the condition of the Site at the time of the Phase I ESA. The Site location is shown on Figure 1. Tables 1 through 4 summarize the physical characteristics of the Site and adjoining properties.

#### 3.1 LOCATION AND LEGAL DESCRIPTION

The information presented in Table 1 includes the physical location and legal description of the Site. This information was obtained from review of various maps (such as topographic maps and tax assessor maps), aerial photographs, public records at City and/or County offices, interviews, and/or information provided by the Client.

**Table 1**  
**Location and Legal Description**

| PARAMETER                    | INFORMATION/COMMENTS   |
|------------------------------|--|
| Location                     | The Site is located adjacent to the south of Rosamond Boulevard, approximately 485 feet west of the intersection of Rosamond Boulevard and 100 <sup>th</sup> Street West, in the unincorporated town of Rosamond, Kern County, California (see Figure 1).  |
| Assessor's Parcel Numbers    | The Site includes Kern County APN 359-051-28.  |
| Legal Description            | The legal description for the Site is included in Environmental Data Resources, Inc (EDR's) report entitled <i>EDR Environmental Lien and AUL Search</i> (EDR, 2019a), which is included in Appendix C.  |
| Address                      | The Site is not associated with an address.  |
| Section, Township, and Range | Township 9 North, Range 14 West, Section 24, San Bernardino Meridian and Baseline.   |
| Zoning                       | Based on Zoning Map 232 obtained online from Kern County Public Works ( <a href="https://kernpublicworks.com/maps/zone-maps/">https://kernpublicworks.com/maps/zone-maps/</a> ), the Site has a combined zoning designation of "E (2 ½) RS FPS", which stands for Estate (2 ½ acres), "Residential Suburban Combining" and "Floodplain-Secondary Combining". |

### 3.2 CURRENT / PROPOSED USE OF THE PROPERTY

At the time of Kleinfelder's assessment, land in the immediate Site vicinity appeared to be mostly undeveloped with scattered residential properties to the east. Current and proposed Site uses are described in Table 2.

**Table 2**  
**Current / Proposed Uses**

| PARAMETER    | GENERAL OBSERVATIONS  |
|--------------|---|
| Current Use  | The Site is undeveloped land.   |
| Proposed Use | Kleinfelder understands the parcel is designated for acquisition as part of the Rosamond Switching Station project. |

### 3.3 DESCRIPTION OF STRUCTURES / IMPROVEMENTS

Structures and/or improvements observed on Site at the time of Kleinfelder's Site reconnaissance are described in Table 3.

**Table 3**  
**Structures / Improvements**

| PARAMETER    | GENERAL OBSERVATIONS   |
|--------------|--|
| Structures   | Access to the Site was not available at the time of the Site reconnaissance; however, no structures were observed from public rights-of-way. |
| Improvements | No improvements were visible.  |

### 3.4 CURRENT USES OF ADJOINING PROPERTIES

Kleinfelder performed a visual survey of the properties adjoining the Site from public right-of-way on September 24, 2019. Summary descriptions of the surrounding properties are presented in Table 4, and the area surrounding the Site is shown on Figure 2, Site Map.

**Table 4**  
**Adjoining Properties**

| <b>DIRECTION</b> | <b>LAND USE DESCRIPTION</b>   |
|------------------|---|
| North            | Rosamond Boulevard and undeveloped land adjoin the Site to the north.   |
| East             | The property to the east is vacant and undeveloped, followed by a residential parcel approximately 80 feet to the east. |
| South            | The property to the south is vacant and undeveloped.  |
| West             | The property to the west is vacant and undeveloped.   |

Hazardous materials and petroleum products were not observed to be stored on the properties adjoining to the Site. No indications of obvious or suspect RECs were apparent on the adjoining properties at the time of Kleinfelder's Site reconnaissance.

## 4 RECORDS REVIEW

---

### 4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

The purpose of the records review was to obtain and review records that would help to evaluate RECs of potential concern in connection with the Site and bordering properties. Federal, state, and local regulatory agencies publish databases or “lists” of businesses and properties that handle hazardous materials or hazardous waste, or are the known location of a release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. Kleinfelder contracted a commercial database service, EDR, of Shelton, Connecticut, to perform the government database search for listings within the ASTM Standard’s minimum search distance from the Site boundary for each searched database. EDR’s *The EDR Radius Map™ Report with GeoCheck®* (EDR, 2019b) is provided in Appendix B. EDR’s report contains a listing of the specific databases outlined by the ASTM Standard. For each searched database, the search distance, date the database was last updated, and type of information contained in the database are specified in EDR’s report.

EDR utilizes a geographical information system to plot the locations of reported spills, leaks, incidents, etc. Kleinfelder reviewed this information to help establish if the Site, or nearby properties, have been included in the searched databases and lists.

### 4.2 RESULTS OF DATABASE SEARCH

The results of the EDR database search are provided in the following sections.

#### 4.2.1 Site Listings

The Site was not listed in databases searched by EDR.

#### 4.2.2 Off-Site Listings

No off-site facilities were listed in databases searched by EDR.

#### 4.2.3 Orphan List

Properties not plotted by EDR due to poor or inadequate address information are referred to as orphans. No unmapped orphan sites are listed in EDR's database search report.

#### 4.3 OTHER RECORDS REVIEWED / AGENCIES CONTACTED

The following additional sources of environmental records were reviewed during this Phase I ESA for the purposes of meeting the ASTM Standard. Local regulatory agencies were contacted for reasonably ascertainable and practically reviewable documentation regarding RECs present at the Site and adjoining facilities. Summaries of interviews with local regulatory agency representatives are included in Section 7 of this report (with interview documentation included in Appendix C). The following agencies (if marked with an "X") were contacted for documentation purposes:

- State of California, Division of Oil, Gas, and Geothermal Resources (DOGGR)
- Eastern Kern Air Pollution Control District (APCD)
- Kern County Building Inspection
- Kern County Public Health Services Department
- Rosamond Community Services District (CSD)
- Pipeline and Hazardous Materials Safety Administration (PHMSA) National Pipeline Mapping System (NPMS)
- California Department of Toxic Substances Control (DTSC)
- State Water Resources Control Board (SWRCB) GeoTracker™; Lahontan Regional Water Quality Control Board (RWQCB)

Information obtained by Kleinfelder from these agencies is presented below.

##### 4.3.1 State of California, Division of Oil, Gas, and Geothermal Resources

Kleinfelder reviewed the DOGGR's Well Finder Database (available at <http://maps.conservation.ca.gov/doggr/index.html>) for information concerning oil and gas fields. Findings from the map review are discussed in Section 4.4, and a copy of the Well Finder search results is provided in Appendix C.

#### 4.3.2 Eastern Kern Air Pollution Control District

Kleinfelder submitted a written request on August 29, 2019 to the APCD for information concerning air or agricultural permits, notices of violation, and notices to comply for the Site. Mr. Gary Ray, Air Quality Administrative Manager at the APCD, responded in a September 3, 2019 email to advise that a search of their database did not produce records associated with the Site APN. A copy of the email is included in Appendix C.

#### 4.3.3 Kern County Building Inspection

On August 29, 2019, Kleinfelder requested via email information concerning building permits from Kern County Building Inspection. On September 10, 2019, Kleinfelder received a response from Kern County Building Inspection advising that no responsive documents were available for the request. A copy of the Kern County Building Inspection response is provided in Appendix C.

EDR provided an *EDR Building Permit Report* for the Site and adjoining properties. EDR researched building permit information with the County of Kern, Building Inspection Division for the years 1987 through 2019, and the Los Angeles County, Building and Safety Division for the years 1970 through 2019. No permits were found for the Site or adjoining properties. A copy of the *EDR Building Permit Report* is provided in Appendix C.

#### 4.3.4 Kern County Public Health Services Department

On August 30, 2019 information concerning septic tanks and water wells was requested by Kleinfelder from published documents available through the Kern County Public Health Services Department internet website (<https://kernpublichealth.com/environmental-health-request-for-public-records/>) for download. On August 30, 2019, Kleinfelder received a response from the Kern County Public Health Services Department advising that no documents were available for the Site APN. A copy of the Kern County Public Health Services Department response is provided in Appendix C.

#### 4.3.5 Rosamond Community Services District

Kleinfelder submitted a written request on August 29, 2019 to the CSD for information concerning if the Site was within the District for sewer or water service. Mr. Brock Smith, responded in a September 3, 2019, phone call to advise that the Site APN was not listed as within the CSD. Mr. Smith advised that septic tanks and personal or shared water supply wells were likely present

on developed properties in the Site vicinity. Based on the unoccupied use of the Site, it is unlikely that the Site has a septic tank or water supply well. A copy of the phone record is included in Appendix C.

#### 4.3.6 Pipeline and Hazardous Materials Safety Administration, National Pipeline Mapping System

Natural gas transmission and hazardous liquid pipeline information is available via the PHMSA's NPMS website (<https://www.npms.phmsa.dot.gov>). Kleinfelder researched NPMS pipeline information on August 29, 2019 for the Site and vicinity. Based on the review, no mapped natural gas transmission or hazardous liquid pipelines are located at or within the vicinity of the Site. A copy of the NPMS map is included in Appendix C.

#### 4.3.7 State Water Resources Control Board, GeoTracker™ / Lahontan Regional Water Quality Control Board

Kleinfelder reviewed the SWRCB GeoTracker™ website for information pertaining to the Site and adjoining properties. Neither the Site nor adjoining properties were listed in databases maintained by the SWRCB. Kleinfelder submitted a written request for information to the Lahontan RWQCB, who responded in an August 29, 2019 email that no records are available for the Site. A copy of the search results is presented in Appendix C.

#### 4.3.8 State Department of Toxic Substances Control

Kleinfelder reviewed the DTSC's online EnviroStor database at (<http://www.envirostor.dtsc.ca.gov/public/>) for information pertaining to the Site, but found no Site records. A copy of the EnviroStor map results is presented in Appendix C.

### 4.4 PHYSICAL SETTING SOURCE(S)

Table 5 presents information concerning the physical setting of the Site. This information was obtained by Kleinfelder from published maps and other sources.

**Table 5**  
**Physical Setting**

| DATA                        | GENERAL INFORMATION  |
|-----------------------------|--|
| USGS Topographic Quadrangle | Based on Kleinfelder's review of the Little Buttes, California 7.5-Minute Series (Topographic) Quadrangle Map, published by the United States Geological Survey (USGS) and dated 2012, the Site surface elevation is approximately 2,475 feet above mean sea level. The topographic relief is relatively flat with a gentle east-southeast slope.  |
| Soil Type                   | Based on the California Geologic Survey (CGS) Geologic Map of California, Little Buttes Sheet (CGS, 2012), the Site and adjoining properties are underlain by younger alluvial fan deposits. The soils are unconsolidated to weakly consolidated, dark yellowish-brown to light yellowish-brown, and fine to medium arkosic silty sand with fine subrounded to subangular gravel.                          |
| Oil and Gas Wells           | Kleinfelder searched the DOGGR's online Well Finder Database ( <a href="http://maps.conservation.ca.gov/doggr/index.html">http://maps.conservation.ca.gov/doggr/index.html</a> ) for oil and gas wells located on the Site and in the Site vicinity. Oil and gas wells are not depicted on Site or within the immediate Site vicinity. A copy of the Well Finder search results is provided in Appendix C. |

Information about the regional geology is presented in Table 6. This information was obtained by Kleinfelder from published data and maps, interviews with public agencies, and/or previous investigations performed by Kleinfelder in the Site vicinity.

**Table 6**  
**Regional Geology and Hydrogeology**

| PHYSICAL PARAMETER                | INFORMATION/COMMENTS   |
|-----------------------------------|--|
| Regional Physiography and Geology | The Site is located in the Antelope Valley of the Mojave Desert geomorphic province. The Mojave Desert occupies about 25,000 square miles of southeastern California and is landlocked, enclosed on the southwest by the San Andreas fault and the Transverse Ranges on the north and northeast by the Garlock fault, the Tehachapi Mountains, and the Basin and Range. The Nevada state line and the Colorado River form the arbitrary eastern boundary, although the province actually extends into southern Nevada and western Arizona. The San Bernardino/Riverside county line is designated as the southern boundary. The region is dominated by broad alleviated basins that are mostly aggrading surfaces receiving non-marine continental deposits from adjacent uplands. The deposits are burying the old topography, which was previously more mountainous (Norris and Webb, 1990). |

**Table 6 (Continued)**  
**Regional Geology and Hydrogeology**

| PHYSICAL PARAMETER  | INFORMATION/COMMENTS   |
|---|--|
| Regional Hydrogeology   | <p>The Site is located within the Antelope Valley Groundwater Basin of the South Lahontan Hydrologic Region. The Antelope Valley Groundwater Basin underlies an extensive alluvial valley in the western Mojave Desert. The basin is bound on the east by ridges, buttes, and low hills that form a surface and groundwater drainage divide, and on the north by Fremont Valley Groundwater Basin at a groundwater divide approximated by a southeastward-trending line from the mouth of Oak Creek through Middle Butte to exposed bedrock near Gem Hill, and by the Rand Mountains farther east (California Department of Water Resources, 2004).</p> <p>The primary water-bearing materials are Pleistocene and Holocene age unconsolidated alluvial and lacustrine deposits that consist of compact gravels, sand, silt, and clay. Coarse alluvial deposits from the two main aquifers of the basin; a lower aquifer and an upper aquifer. The upper aquifer is the primary source of groundwater for the valley and is generally unconfined. The lower aquifer is generally confined.</p> |
| Depth to Groundwater and Direction of Anticipated Flow <sup>1</sup> | <p>Based on groundwater level measurements collected from federal and state wells, as reported in the EDR Report (2019b), groundwater is anticipated to be greater than 100 feet below the ground surface. Specific groundwater flow information for the Site and immediate vicinity has not been identified as part of this Phase I ESA; however, groundwater flow is anticipated to flow toward the east-southeast, following regional surface topography.</p>   |
| Regional Groundwater Quality Problems                               | <p>Regional groundwater quality problems were not identified during this Phase I ESA.</p>  |
| Water Supply  | <p>Water is not currently supplied to the Site, due to the Site being vacant with no structures.</p>   |
| Flood Zone Designation  | <p>The Site is located within a 100-year flood zone (EDR, 2019b).</p>  |

<sup>1</sup> Groundwater flow direction is based on regional information sources. Site-specific conditions may vary due to a variety of factors including geologic anomalies, utilities, nearby pumping wells (if present), and others.

#### 4.5 USER PROVIDED INFORMATION

Kleinfelder understands that the Client is requesting a Phase I ESA be performed as part of a potential property transaction. Information regarding the current owners/occupants of the Site is summarized in Table 7.

**Table 7  
 Owner / Occupant Information**

| ENTITY      | NAME   |
|-------------|--|
| Owner       | According to the <i>EDR Environmental Lien and AUL Search</i> report (EDR, 2019a), the Site is vested in Armando M. Mendoza and Estela P. Mendoza, Husband and Wife as Joint Tenants. The title was received from Nemesio L. Dagang and Purita P. Dagang, Husband and Wife as Joint Tenants. |
| Occupant(s) | The Site is currently vacant and unoccupied.   |

The following sections present information provided to Kleinfelder by the Client.

#### 4.5.1 Title Records

A Chain-of-Title Report was not provided by the Client; therefore, a Chain-of-Title report was not reviewed as part of this Phase I ESA.

#### 4.5.2 Environmental Liens and Usage Limitations

According to information provided in EDR's regulatory agency database search report (EDR, 2019b), there are no liens pertaining to the Site listed in the Federal Superfund Liens List maintained by the United States Environmental Protection Agency. Additionally, no recorded land-use environmental deed restrictions pertaining to the Site are indicated to be listed in the State Liens Database.

A review of the *EDR Environmental Lien and AUL Search* report (EDR, 2019a) for the Site indicates there are no environmental liens or activity and use limitations (AULs) associated with the Site. According to Mr. Massoud Saboury, Director of Real Estate for LADWP, a comprehensive title search that may indicate whether environmental liens or AULs are associated with the Site, has not yet been performed.

#### 4.5.3 Value Reduction

As part of the ASTM Designation E 1527-13 process, information regarding the prospective purchase price of the Site relative to its fair market value is to be considered. If there appears to be a value reduction, that reduction must be identified with respect to whether the difference could be attributed to environmental degradation of the property. A questionnaire was forwarded to the Client for information pertaining to whether the purchase price affects the fair market value. Based

Los Angeles Department of Water and Power  
Rosamond Switching Station  
APN: 359-051-28, Rosamond, Kern County, California  
Phase I Environmental Site Assessment

on a questionnaire completed by Massoud Saboury of LADWP, a fair market price has not yet been established for the Site. A copy of the questionnaire is provided in Appendix C.

#### 4.5.4 Other Information/Documents Provided

Other information was not provided by the Client.

## 5 HISTORY OF THE SITE

The history of the Site was researched to identify obvious uses. Historical land use was researched to the first developed use, or back to 1940, whichever was earlier or readily available. Table 8 summarizes the availability of information reviewed during this assessment.

**Table 8**  
**Historical Information Sources**

| SOURCE                            | YEARS REVIEWED   | SOURCE / AVAILABILITY                          |
|-----------------------------------|--|--|
| Sanborn Fire Insurance Maps       | Not available  | EDR, 2019c                                     |
| Aerial Photographs                | 1948, 1952, 1968, 1973, 1987, 1995, 2006, 2009, 2012, and 2016 | EDR, 2019d                                     |
| City Directories                  | 1975, 1980, 1985, 1992, 1995, 2000, 2005, 2010, and 2014       | EDR, 2019e                                     |
| Historical Topographic Map Report | 1915, 1917, 1943, 1947, 1965, 1974, and 2012                   | EDR, 2019f                                     |
| Building Department               | See Section 4.3.3  | EDR, 2019g;<br>Kern County Building Inspection |
| Previous Assessment(s)            | Not available  | Not available                                  |

### 5.1 SANBORN FIRE INSURANCE MAPS

Sanborn Fire Insurance Maps provide historical land use information for some metropolitan areas and small, established towns. Kleinfelder requested EDR to search its library of Sanborn Fire Insurance Maps for maps of the Site. EDR responded that Sanborn Fire Insurance Maps were not available for the Site (EDR, 2019c). A copy of the Certified Sanborn® Map Report provided by EDR is included in Appendix D.

### 5.2 AERIAL PHOTOGRAPHS

A review of historical aerial photography may indicate past activities at a property that may not be documented by other means or observed during a reconnaissance visit. The effectiveness of this technique depends on the scale and quality of the photographs and the available coverage. Aerial photographs were obtained from several historical photograph collections through EDR (2019d), and span a period of approximately 68 years. A summary of information obtained from the aerial

photographs reviewed by Kleinfelder is presented in Table 9. Copies of the aerial photographs provided by EDR are included in Appendix D.

**Table 9**  
**Historical Aerial Photographs Reviewed**

| YEAR                         | APPROXIMATE SCALE | SUMMARY   |
|------------------------------|-------------------|---|
| 1948<br>1952<br>1968         | 1 inch = 500 feet | <p><b>Site:</b> The Site appears as undeveloped land with low lying vegetation. A natural drainage feature is visible in the central portion of the Site, generally oriented northwest to southeast.</p> <p><b>Surrounding Area:</b> Rosamond Boulevard is apparent adjoining the Site to the north. Adjoining properties to the north appear to be utilized for agricultural purposes. Adjoining properties to the east, south and west appear to be undeveloped with low lying desert vegetation similar to the Site. The LADWP easement appears west of the Site in 1968, although not adjoining the Site.</p> |
| 1973                         | 1 inch = 500 feet | <p><b>Site:</b> The Site generally remains the same as the previously-reviewed aerial photographs.</p> <p><b>Surrounding Area:</b> The properties adjoining the Site generally appear the same as on the 1968 aerial photograph, although the agricultural land north of the Site does not appear as prominent.</p>   |
| 1987                         | 1 inch = 500 feet | <p><b>Site:</b> The Site generally remains the same as the previously-reviewed aerial photograph.</p> <p><b>Surrounding Area:</b> The adjoining properties generally appear the same as the previously-reviewed aerial photograph. However, the property north of the Site no longer appears to be used for agricultural purposes. A property located approximately 165 feet to the east of the Site has been cleared of vegetation, and a small structure or trailer is apparent.</p>  |
| 1995                         | 1 inch = 500 feet | <p><b>Site:</b> The Site generally remains the same as the previously-reviewed aerial photograph.</p> <p><b>Surrounding Area:</b> Adjoining properties appear vegetated with low-lying desert vegetation. The structure/trailer east of the Site is no longer apparent. Rosamond Boulevard appears to have been improved.</p>   |
| 2006<br>2009<br>2012<br>2016 | 1 inch = 500 feet | <p><b>Site:</b> The Site appears generally the same as on the 1995 aerial photograph.</p> <p><b>Surrounding Area:</b> Adjoining properties appear generally the same as the previously reviewed aerial, with the exception of a property developed for residential use visible approximately 165 feet to the east of the Site, beginning with the 2009 aerial photograph.</p>   |

Note: Aerial photographs only provide information concerning indications of land use, and no conclusions regarding the release of hazardous substances or petroleum products can be drawn from the review of photographs alone.

### 5.3 CITY DIRECTORIES

City directories provide information regarding property occupants listed by property address. Because the Site and adjoining properties do not have associated addresses, there are no listings in the city directories for the Site and adjoining properties.

### 5.4 HISTORICAL TOPOGRAPHIC MAP REVIEW

Kleinfelder obtained information regarding historical topographic maps of the Site vicinity from EDR (2019f). The topographic maps reviewed for this assessment are listed in Table 10, and copies of the maps are included in Appendix D.

**Table 10**  
**Historical Topographic Maps Reviewed**

| YEAR         | SCALE                 | SUMMARY  |
|--------------|-----------------------|--|
| 1915<br>1917 | 1:96,000<br>1:125,000 | <p><b>Site:</b> The Site is depicted undeveloped, with no structures or other features shown, except for a natural drainage feature depicted in the south portion of the Site.</p> <p><b>Surrounding Area:</b> No development is depicted on the adjoining properties. Rosamond Boulevard and 100<sup>th</sup> Street West are in their current alignments adjoining to the north and approximately 485 feet east of the Site, respectively.</p>   |
| 1943<br>1947 | 1:62,500<br>1:50,000  | <p><b>Site:</b> The Site is depicted as undeveloped, with no structures or other features shown. A drainage is shown passing through central portion of the Site.</p> <p><b>Surrounding Area:</b> The surrounding area is generally the same as depicted on the previously-reviewed topographic map. By at least 1943, Rosamond Boulevard is depicted as a secondary highway. Additional secondary highways and lesser roads are depicted south of the Site.</p>   |
| 1965<br>1974 | 1:24,000              | <p><b>Site:</b> The Site is depicted undeveloped, with no structures or other features shown.</p> <p><b>Surrounding Area:</b> The surrounding area is shown generally the same as on the previously-reviewed topographic map. Unimproved roads are depicted east of 100<sup>th</sup> Street West, and approximately 660 feet south of the Site. 100<sup>th</sup> Street West is depicted as a secondary highway. The LADWP easement, although not labeled, is depicted approximately 1,130 feet northwest of the Site.</p> |

**Table 10 (Continued)**  
**Historical Topographic Maps Reviewed**

| YEAR | SCALE    | SUMMARY  |
|------|----------|--|
| 2012 | 1:24,000 | <p><b>Site:</b> The 2012 topographic map depicts physical features (e.g., roads and surface water), but does not depict structures; therefore, no structures are shown on the Site.</p> <p><b>Surrounding Area:</b> The LADWP easement is now labeled to the northwest of the Site. Other ancillary roads are labeled east of 100th Street West and farther south of the Site.</p> |

### 5.5 BUILDING DEPARTMENT

Kleinfelder requested information from Kern County Building Inspection department regarding pertinent building permits associated with the Site. A summary of building permit information is provided in Section 4.3.3.

### 5.6 PREVIOUS ASSESSMENTS

Previous assessment reports were not available in regulatory agency records.

## 6 SITE RECONNAISSANCE

Kleinfelder’s Phase I ESA activities included a Site reconnaissance. This section summarizes the findings from the Site reconnaissance.

### 6.1 METHODOLOGY AND LIMITING CONDITIONS

Ms. Lindsay Gattman and Ms. Margaret Carroll of Kleinfelder performed a Site reconnaissance on September 24, 2019. The Site reconnaissance included a visual inspection of the Site to assist in identifying the presence or likely presence of hazardous substances or petroleum hydrocarbons under conditions that indicate an existing release, a past release, or threat of release into structures, soil, groundwater, or surface water at the Site (i.e., RECs). Observations of readily-apparent environmental conditions are summarized in Table 11, and color photographs of the Site are presented on Figures 3 and 4. The approximate Site boundaries are shown on Figure 2. Access to the Site was not available at the time of the Site reconnaissance. Therefore, Ms. Gattman and Ms. Carroll, accompanied by Ms. Elizabeth Ninan of LADWP, observed the Site from public right-of-ways.

### 6.2 GENERAL SITE SETTING

The Site adjoins Rosamond Boulevard to the south, approximately 485 feet west of the intersection of Rosamond Boulevard and 100<sup>th</sup> Street West, in the unincorporated town of Rosamond, California. The Site is surrounded by undeveloped properties.

### 6.3 SITE OBSERVATIONS

Kleinfelder’s Site observations are summarized in Table 11.

**Table 11**  
**Site Observations**

| GENERAL OBSERVATIONS                | REMARKS  | OBSERVED | NOT OBSERVED |
|-------------------------------------|--|----------|--------------|
| Current use                         | The parcel is vacant and undeveloped with low-lying desert vegetation. | X        |              |
| Current use likely to indicate RECs |  |          | X            |
| Past use                            | The Site has remained undeveloped, based on the information reviewed.  |          | X            |

**Table 11 (Continued)**  
**Site Observations**

| <b>GENERAL OBSERVATIONS</b>  | <b>REMARKS</b>   | <b>OBSERVED</b> | <b>NOT OBSERVED</b> |
|--|--|-----------------|---------------------|
| Past use likely to indicate RECs   |  |                 | X                   |

| Wells (dry)   |  |          | X            |
| Wells (oil and gas)   |  |          | X            |

### 6.3 RESULTS OF SITE RECONNAISSANCE

The Site is currently an undeveloped parcel of land that is sparsely covered with low-lying desert vegetation. Due to lack of access to the Site, the reconnaissance was limited to observations from public rights-of-way.

No structures were visible, and the Site appeared to be undeveloped with low-lying vegetation. No evidence of unauthorized dumping was observed.

Evidence of discolored water, stressed vegetation, USTs, pits, sumps, ponds, and lagoons was not observed in the Site vicinity during the reconnaissance.

## 7 INTERVIEWS

---

Key Site Managers are contacted to obtain current and historical environmental information concerning the Site. The following sections highlight information revealed during the interviews.

### 7.1 INTERVIEW WITH CLIENT/OWNER/MANAGER

Kleinfelder submitted a written questionnaire to the Client. According to a questionnaire completed by Massoud Saboury, Director of Real Estate for LADWP, LADWP owns real property for an electrical transmission line in the area. However, LADWP does not have knowledge of prior uses of the Site, or of chemicals or processes that may have been used at the Site. A copy of the questionnaire is provided in Appendix C.

Interview information was also received from the Site owners, Armando and Estela Mendoza. The Mendozas were not aware of the prior land use, structures, and owners associated with the Site. According to the Mendozas, no tanks, chemical storage, wells, septic systems, violations, pesticides, pipelines, or other environmental concerns are associated with the Site. A copy of the questionnaire is provided in Appendix C.

### 7.2 INTERVIEW WITH OCCUPANTS

The Site is currently vacant and unoccupied; therefore, interviews with occupants were not performed as part of this Phase I ESA.

### 7.3 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

On September 3, 2019, a phone call was received from Mr. Brock Smith of Rosamond CSD in regard to the records request for the Site. Mr. Smith advised that records were not available as the Site was not within the District's sewer/water service. Mr. Smith advised that septic tanks and personal or shared wells were likely present on developed properties in the Site vicinity.

On September 23, 2019, during a phone call to the Kern County Public Health Services Environmental Division, Mr. Kevin Beahm indicated that his department would not be likely to have septic tank records, since septic tank records for the Site area are only maintained for the

Los Angeles Department of Water and Power

APN: 359-051-28, Rosamond, Kern County, California  
Phase I Environmental Site Assessment

last three years. After a search of records, none were identified for the Site. Mr. Bean recommended contacting Kern County Building Inspection, since they might have records regarding older septic tanks.

On September 23, 2019, during a phone call to Kern County Building Inspection, Ms. Eleanor Lara indicated that no records are associated with the Site.

## 8 EVALUATION

---

Kleinfelder performed this Phase I ESA of the Site consistent with the scope and limitations of the ASTM Standard. The following sections describe Kleinfelder's findings and provide general background information about the Site. Findings address RECs, CRECs, HRECs, and notation of *de minimis* quantities, as applicable to the Site. A summary of the findings of this Phase I ESA is provided below:

### 8.1 FINDINGS

- The Site comprises an approximately 2.28-acre parcel of land, identified as Kern County APN 359-051-28, located adjacent to the south of Rosamond Boulevard, approximately 485 feet west of the intersection of Rosamond Boulevard and 100<sup>th</sup> Street West in the unincorporated town of Rosamond, Kern County, California. The Site is undeveloped land, which is covered in sparse low-lying desert vegetation.
- Historical information reviewed for this Phase I ESA indicates the Site was vacant, undeveloped, and vegetated from 1915 through present.
- Due to access restrictions, the Site was observed from public right-of-ways. No structures were visible, and the Site appeared to be undeveloped with low-lying vegetation. No evidence of unauthorized dumping was observed.
- No off-Site facilities were identified as potential concerns to the Site.

### 8.2 DEVIATIONS AND ADDITIONAL SERVICES

The scope of this Phase I ESA does not incorporate ASTM Standard non-scope considerations, such as ACMs, radon, LBP, lead in drinking water, regulatory compliance, industrial hygiene, health and safety, indoor air quality, and high-voltage power lines.

### 8.3 CONCLUSIONS AND RECOMMENDATIONS

Kleinfelder has performed a Phase I ESA in conformance with the scope of services required by the ASTM Standard, Kleinfelder's Proposal No. MW180800.001P/LAN19P99810 dated August 26, 2019, and the limitations provided in this report. Exceptions to and deviations from this practice

are described in Section 8.1 of this report. This Phase I ESA did not identify RECs, CRECs, or HRECs associated with the Site.

#### 8.4 DATA GAPS

Kleinfelder attempted to obtain reasonably ascertainable information regarding the Site consistent with ASTM Standard Practice E 1527-13. Based on a review of information for the Site, the following data gap was identified:

- Due to lack of Site access, an interior Site reconnaissance was not performed.

Based on the historical and current use of the Site, this data gap is not considered a significant data failure likely to have affected the identification of hazardous substances or petroleum products for the evaluation of RECs at the Site.

## STATEMENT OF QUALIFICATIONS

We declare that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were not identified.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

There were no unmapped sites in this report.

# OVERVIEW MAP - 5767611.2S

Target Property

Sites at elevations higher than or equal to the target property

Sites at elevations lower than the target property

Manufactured Gas Plants

National Priority List Sites

Dept. Defense Sites

Indian Reservations BIA

Power transmission lines

100-year flood zone

500-year flood zone

National Wetland Inventory

State Wetlands

Areas of Concern

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|   | Data Release Frequency: Quarterly      |

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

|   | Data Release Frequency: Quarterly       |

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Last EDR Contact: 04/30/2019

Next Scheduled EDR Contact: 08/12/2019

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

|   | Data Release Frequency: Quarterly           |

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/24/2019

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Next Scheduled EDR Contact: 09/16/2019  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

ROSAMOND SWITCHING STATION  
ROSAMOND BLVD/100 STREET WEST  
ROSAMOND, CA 93560

### TARGET PROPERTY COORDINATES

Latitude (North): 34.859455 - 34° 51' 34.04"  
Longitude (West): 118.312131 - 118° 18' 43.67"  
Universal Tranverse Mercator: Zone 11  
UTM X (Meters): 380055.1  
UTM Y (Meters): 3858045.2  
Elevation: 2472 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map: 5630793 LITTLE BUTTES, CA  
Version Date: 2012  
  
North Map: 5630781 WILLOW SPRINGS, CA  
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

|   |                         |
|---|-------------------------|
| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
| 06029C4000E                                 | FEMA FIRM Flood data    |
| <u>Additional Panels in search area:</u>    | <u>FEMA Source Type</u> |
| Not Reported                                |                         |

## **NATIONAL WETLAND INVENTORY**

|                                    |  |
|------------------------------------|--|
| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u>            |
| LITTLE BUTTES                      | YES - refer to the Overview Map and Detail Map |

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

|                |            |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status:        | Not found  |

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| Not Reported  |                         |   |

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Rosamond

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information |          |           |                                    |   |   |  |                      |
|------------------------|----------|-----------|------------------------------------|---|---|--|----------------------|
| Layer                  | Boundary |           | Soil Texture Class                 | Classification  |   | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH)   |
|                        | Upper    | Lower     |                                    | AASHTO Group  | Unified Soil  |  |                      |
| 1                      | 0 inches | 7 inches  | fine sandy loam                    | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 14<br>Min: 4                            | Max: 8.4<br>Min: 7.9 |
| 2                      | 7 inches | 59 inches | stratified loam to silty clay loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 14<br>Min: 4                            | Max: 8.4<br>Min: 7.9 |

### Soil Map ID: 2

Soil Component Name: Rosamond

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

### RADON

#### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Years Associated: \_\_\_\_\_

Please answer the following questions to the best of your knowledge.

1. Was the property or adjoining property ever used for industrial purposes (e.g. manufacturing) or as a gas station, dry cleaners, waste treatment, processing facility, motor repair facility, photo lab, commercial printing facility, junkyard/disposal/recycling/ landfill? If yes, please list the activity, hazardous substances used, and approximate dates when the activity occurred.

Prior land use, hazardous substances used, and dates:

NO

Prior owners, key site managers/operators, occupants and dates:

N/A

Existing or prior structures used for what purposes and duration:

NO USE

2. Do any of the following documents exist for the site or any portion of the site? If so, can you provide Kleinfelder with a copy? (This question to be asked before site visit).

- Environmental site assessment reports
- Environmental compliance audit reports
- Environmental permits
- Underground Storage Tank registration
- Underground Injection System registration
- Material Safety Data Sheets
- Community Right-To-Know Plan
- Safety plans: preparedness and prevention plans; spill prevention; countermeasure; and control plans, etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area;
- Correspondence from any government agency relating to past or current violations of environmental laws with regard to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity and Use Limitations (AULs)

N/A

3. Have you ever observed evidence of or do you have prior knowledge of any of the following items being used, stored, discarded, dumped above grade, buried, or burned onsite? Circle all that apply and indicate amount and approximate dates.

| MATERIAL   | QUANTITY | DATE(S) OBSERVED | COMMENTS                             |
|--|----------|------------------|--------------------------------------|
| Above ground storage tank (AST)*                   | NONE     | N/A              | Size:<br>Contents: N/A<br>Condition: |
| Automotive batteries                               | NONE     | ↓                | ↓                                    |

\*Please provide records if available.

8. Is the property served by a private well or non-public water system? If so, please answer the following:

a. Was the well used for domestic (D), agricultural irrigation (I), or monitoring (M) purposes? Are the wells currently operational and if not, when were they last used? When was the well drilled? How deep is the well? What is the approximate discharge rate?

| Well No. | Type | Operating? | Last Used | Date Drilled | Depth | Discharge Rate | Location |
|----------|------|------------|-----------|--------------|-------|----------------|----------|
| 1-       | NONE | N/A        | N/A       | N/A          | N/A   | N/A            | N/A      |
| 2-       | NONE | N/A        | N/A       | N/A          | N/A   | N/A            | N/A      |

b. Have the wells been sampled for contaminants that exceed applicable requirements for the designated use (e.g. Drinking Water Standards)? If so, please provide the dates and copies of well records.

N/A

c. Has the well or water system been designated by any governmental environmental/health agency as contaminated?

N/A

9. Is there an oil/gas well or oil/gas vent located onsite? If so, please indicate the location. Please supply any documents available.

NONE

10. Is the property or has the property to your knowledge been previously served by a septic system? If so, please indicate the location of the tank and leach lines (if applicable) and list any hazardous materials disposed.

NONE

11. Does the property discharge waste water into a storm water sewer system or a sanitary sewer system onto or adjacent to the property? If so, please describe location, piping flow, quantity discharged, and water quality.

NONE

12. Do you have knowledge of the following with respect to the property? Circle and explain all that apply.

NO

- a. Environmental clean-up, ongoing or pending.
- b. Environmental liens
- c. Governmental notifications regarding any possible past or present violations of environmental laws.
- d. Past, threatened, pending lawsuits or administrative proceedings relevant to a release of a hazardous substance or petroleum product, in, on, or from the property.

- NA
- e. Prior environmental assessment that indicated the presence of hazardous substances, petroleum hydrocarbons, contaminants, or recommended further assessment.
  - f. Deed Restrictions
  - g. Citizen complaints regarding activities onsite

**AGRICULTURAL SITES:**

13. What crops have been grown onsite, currently and in the past?

| CROP | DATE | LOCATION |
|------|------|----------|
| NONE | N/A  | N/A      |
| ↓    | ↓    | ↓        |
| ↓    | ↓    | ↓        |
| ↓    | ↓    | ↓        |
| ↓    | ↓    | ↓        |

If crops are present or have been grown, please answer questions 14 through 16 below:

14. Have pesticides been applied to fields or other portions of the site? If so, please answer the following questions:

- a. List the names of pesticides (includes herbicides, fungicides, insecticides, rodenticide) used and dates applied.

| PESTICIDE AND BRAND NAME | DATE | CROP OR ANIMAL USE |
|--------------------------|------|--------------------|
| NONE                     | N/A  | N/A                |
| ↓                        | ↓    | ↓                  |
| ↓                        | ↓    | ↓                  |
| ↓                        | ↓    | ↓                  |
| ↓                        | ↓    | ↓                  |

b. Have you been notified of any violation of environmental law with respect to application or storage of pesticides?

N/A

c. Location of pesticide mixing areas, if any (past or present)?

N/A

d. Method of pesticide application?

N/A

15. Have fertilizers been applied to the site? What type and method of application?

N/A

16. Are there any buried pipelines for irrigation or other purposes onsite? If so, what materials is the piping constructed of? Asbestos containing material, PVC, other? Describe the location of buried piping.

NONE

## INTRODUCTION

In order to qualify for one of the *Landowner Liability Protections (LLPs)*<sup>1</sup> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"),<sup>2</sup> the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

### (1.) Environmental liens that are filed or recorded against the *property* (40 CFR 312.25).

Did a search of *recorded land title records* (or judicial records where appropriate, see *Note 1* below) identify any environmental liens filed or recorded against the *property* under federal, tribal, state or local law?

At this time, a comprehensive title search has not been conducted by LADWP's Real Estate Group

*Note 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.*

### (2.) Activity and use limitations that are in place on the *property* or that have been filed or recorded against the *property* (40 CFR 312.26(a)(1)(v) and vi)).

Did a search of *recorded land title records* (or judicial records where appropriate, see *Note 1* above) identify any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the *property* and/or have been filed or recorded against the *property* under federal, tribal, state or local law?

At this time, a comprehensive title search has not been conducted by LADWP's Real Estate Group

### (3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an *adjoining property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

LADWP owns real property adjacent to some of the parcels for an electrical transmission line. LADWP's Real Estate Group does not have knowledge of chemicals or processes used at the site.

### (4.) Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).

<sup>1</sup> *Landowner Liability Protections*, or *LLPs*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability* ("Common Elements" Guide) issued on March 6, 2003.

<sup>2</sup> P.L. 107-118.

ASTM E1527-13  
Phase I Environmental Site Assessment  
User Questionnaire

Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

Not Applicable. A fair market price has not yet been established.

**(5.) Commonly known or *reasonably ascertainable* information about the *property* (40 CFR 312.30).**

Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases?

No

*For example,*

- (a.) Do you know the past uses of the *property*?
- (b.) Do you know of specific chemicals that are present or once were present at the *property*?
- (c.) Do you know of spills or other chemical releases that have taken place at the *property*?
- (d.) Do you know of any environmental cleanups that have taken place at the *property*?

**(6.) The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

Based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of releases at the *property*?

No

In addition, certain information should be collected, if available, and provided to the *environmental professional* conducting the *Phase I Environmental Site Assessment*. This information is intended to assist the *environmental professional*, but is not necessarily required to qualify for one of the *LLPs*. The information includes:

- (a) the reason why the Phase I is being performed,
- (b) the type of *property* and type of *property* transaction, for example, sale, purchase, exchange, etc.,
- (c) the complete and correct address for the *property* (a map or other documentation showing *property* location and boundaries is helpful),

**ASTM E1527-13**  
**Phase I Environmental Site Assessment**  
**User Questionnaire**

(d) the scope of services desired for the Phase I ESA (including whether any parties to the *property* transaction may have a required standard scope of services or whether any considerations beyond the requirements of Practice E1527 are to be considered),

(e) identification of all parties who will rely on the Phase I *report* ,

(f) identification of the site contact and how the contact can be reached,

(g) any special terms and conditions which must be agreed upon by the *environmental professional*, and

(h) any other knowledge or experience with the *property* that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the *property* and its environmental condition).

The *USER QUESTIONNAIRE* was completed by:

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

**Thank you for your business.**

Please contact EDR at 1-800-352-0050  
with any questions or comments.

# EDR BUILDING PERMIT REPORT

## About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

## ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

## Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

## EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Kleinfelder, Inc. on Aug 29, 2019.

### **TARGET PROPERTY**

Rosamond Blvd/100 Street West  
Rosamond, CA 93560

### **SEARCH METHODS**

EDR searches available lists for both the Target Property and Surrounding Properties.

### **RESEARCH SUMMARY**

Building permits identified: **NO PERMITS IDENTIFIED**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

Name: JurisdictionName  
Years: Years  
Source: Source  
Phone: Phone

No Permits Found

## ADJOINING PROPERTY FINDINGS

### ADJOINING PROPERTY DETAIL

The following Adjoining Property addresses were researched for this report. Detailed findings are provided for each address.

No Permits Found

## GLOSSARY

### General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

## GLOSSARY

### Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

### Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

Mr. Brock Smith was returning a phone call in response to a request for information regarding whether or not the site was included in the district sewer/water service. Mr. Smith advised that the site did not receive service and would likely have a septic tank and an individual or shared well for water.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

# EDR Historical Topo Map Report

08/29/19

**Site Name:**

Rosamond Switching Station  
Rosamond Blvd/100 Street We  
Rosamond, CA 93560  
EDR Inquiry # 5767611.4

**Client Name:**

Kleinfelder, Inc.  
24411 Ridge Rte Dr Suite 225  
Laguna Hills, CA 92653  
Contact: Lindsay Gattman

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Kleinfelder, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.
